January 12, 2023

WHEAT: The 2022/23 U.S. outlook this month is for increased supplies, larger domestic use, unchanged exports, and lower ending stocks. Supplies are raised on higher beginning stocks as reported in today's NASS *Grain Stocks* report. Feed and residual use is raised 30 million bushels to 80 million based on higher second-quarter implied disappearance based on the *Grain Stocks* report. Seed use is raised 3 million bushels to 69 million, reflecting larger than expected winter wheat plantings reported in today's NASS *Winter Wheat and Canola Seedings* report. Projected 2022/23 ending stocks are lowered slightly as larger domestic use more than offsets higher beginning stocks. The season-average farm price is unchanged at \$9.10 per bushel.

The 2022/23 global outlook is for increased supplies, exports, consumption, and stocks. World supplies are raised 1.3 million tons to 1,058.1 million on production increases in Ukraine and the EU. World consumption for 2022/23 is raised by 0.2 million tons to 789.7 million as higher feed and residual use for the United States more than offsets a decline for Ukraine. Projected 2022/23 global trade is increased 0.8 million tons to 211.6 million as increases for the EU and Ukraine more than offset a decline for India. EU and Ukraine exports are raised 0.5 million tons each to 36.5 and 13.0 million respectively on higher exportable supplies. Projected 2022/23 global ending stocks are raised 1.1 million tons to 268.4 million, with increases for the EU, Ukraine, Kazakhstan, and India more than offsetting declines in Saudi Arabia and Iran.

COARSE GRAINS: This month's 2022/23 U.S. corn outlook is for reduced production, food, seed, and industrial use (FSI), feed and residual use, exports, and ending stocks. Corn production is estimated at 13.730 billion bushels, down 200 million as an increase in yield is more than offset by a 1.6 million acre cut to harvested area. Total corn use is reduced 185 million bushels to 13.915 billion. Exports are reduced 150 million bushels to 1.925 billion, reflecting the slow pace of shipments through December, and the lowest level of outstanding sales as of early January since the 2019/20 marketing year. FSI use is lowered 10 million bushels, with reductions in corn used for starch and glucose and dextrose. Feed and residual use is down 25 million bushels to 5.275 billion, based on indicated disappearance during the September-November quarter as reflected by the *Grain Stocks* report. With supply falling more than use, 2022/23 corn stocks are lowered 15 million bushels. The season-average corn price received by producers is unchanged at \$6.70 per bushel.

Global coarse grain production for 2022/23 is forecast down 7.3 million tons to 1,446.4 million. This month's foreign coarse grain outlook is for lower production, greater trade, and reduced stocks. Foreign corn production is forecast down with declines for Argentina and Brazil partly offset by an increase for China. Production is reduced for Argentina reflecting declines to both area and yield, as heat and dryness during December and into early January reduce yield prospects for early-planted corn in key central growing areas. Brazil corn

production for 2022/23 is cut reflecting dry conditions for first-crop corn in parts of southern Brazil. China corn production is higher based on the latest area and yield data from the National Bureau of Statistics. Barley production is raised for the United Kingdom but lowered for Ukraine.

Major global coarse grain trade changes for 2022/23 include increased corn exports for Ukraine and reductions for Argentina and the United States. For 2021/22, Argentina's exports for the marketing year beginning in March 2022 are lowered based on observed shipments to date, while Brazil is raised. Corn imports for 2022/23 are lowered for Vietnam and Peru. China's corn feed and residual use is raised based on a larger crop and lower sorghum imports. Foreign corn ending stocks are down, mostly reflecting reductions for Ukraine, Brazil, Pakistan, and Paraguay with a partly offsetting increase for China. Global corn stocks, at 296.4 million tons, are down 2.0 million.

RICE: The outlook for 2022/23 U.S. rice this month is for smaller supplies, higher domestic use, decreased exports, and lower ending stocks. Supplies are reduced on lower production as NASS estimated all rice production at 160.4 million cwt, down 3.9 million from the previous estimate. The all rice average yield is estimated at 7,383 pounds per acre, down 166 pounds from the prior estimate. All rice domestic and residual use is raised 5.0 million cwt to 147.0 million on higher implied usage for August-November as indicated by the NASS *Rice Stocks* report. Exports are lowered by 3.0 million cwt to 66.0 million, which would be the lowest since 1985/86. Long-grain exports are reduced 2.0 million cwt to 49.0 million as U.S. rice continues to face heightened South American competition in its core Western Hemisphere markets. Medium- and short-grain exports are lowered 1.0 million cwt to 17.0 million on reduced exports to Northeast Asia markets. Projected 2022/23 all rice ending stocks are lowered 6.0 million cwt to 32.1 million. The projected 2022/23 all rice season-average farm price is raised \$0.20 per cwt to \$19.20, with increases in both the long-grain and Other States medium-and short grain prices.

The 2022/23 global outlook is for larger supplies, reduced consumption, increased trade, and higher ending stocks this month. Supplies are raised 0.5 million tons to 686.1 million, as higher beginning stocks for Brazil, Vietnam, and Pakistan along with increased production for India more than offset reduced production for China. World 2022/23 consumption is lowered 0.8 million tons to 516.1 million, mainly on reductions for China and Cambodia not completely offset by increases for the Philippines and Pakistan. Projected world ending stocks are raised 1.3 million tons to 170.0 million, primarily on increases for Vietnam, India, and Brazil.

OILSEEDS: U.S. oilseed production for 2022/23 is estimated at 126.0 million tons, down 2.0 million from the previous report on smaller soybean, sunflower, canola, and peanut crops. Soybean production is estimated at 4.276 billion bushels, down 69 million led by reductions for Missouri, Indiana, Illinois, and Kansas. Harvested area is estimated at 86.3 million acres, down 0.3 million from the previous report. Yield is estimated at 49.5 bushels per acre, down 0.6 bushels. The soybean export forecast is reduced 55 million bushels to 2.0 billion, reflecting lower supplies, reduced import demand for China, and a higher export forecast for Brazil. With lower supplies only partly offset by reduced exports, ending stocks are projected at 210 million bushels, down 10 million from the previous forecast.

The U.S. season-average soybean price for 2022/23 is projected at \$14.20 per bushel, up 20 cents. The soybean meal price is projected at \$425 per short ton, up 15 dollars. The soybean oil price forecast is unchanged at 68 cents per pound.

The 2022/23 foreign soybean supply and demand forecasts include higher stocks and lower production, crush, and trade. Beginning stocks are raised due to an upward revision to Brazil's 2021/22 soybean crop to 129.5 million tons, driven by higher-than-expected use through the end of the local year. Foreign 2022/23 soybean production is lowered 1.3 million tons as lower production for Argentina and Uruguay is partly offset by higher production for China and Brazil. Argentina's soybean crop is reduced 4 million tons to 45.5 million on lower area and early season heat and dry weather conditions. China's soybean crop is increased 1.9 million tons to 20.3 million on reports from China's National Bureau of Statistics. Brazil's crop is increased 1.0 million tons to 153.0 million on higher area.

Foreign 2022/23 soybean crush is reduced 2.0 million tons mainly for Argentina and China. Argentina's crush is reduced on lower supplies while crush for China is reduced on a lower-than-expected pace during the first quarter of the marketing year. Partly offsetting is higher soybean crush for Brazil. Foreign soybean exports are reduced on lower exports for Argentina that are partly offset by higher exports for Brazil. China's imports are lowered 2 million tons to 96 million on lower crush demand. With higher beginning stocks and lower use, global soybean ending stocks are increased 0.8 million tons to 103.5 million.

SUGAR: U.S. sugar supply for 2022/23 is increased 178,027 short tons, raw value (STRV) over last month. Revisions for 2021/22 increase 2022/23 beginning stocks by 4,472 STRV. Louisiana production in September 2022 is increased by 19,259 STRV on processor reporting. This is partially offset by an increase in miscellaneous adjustments in use reported in the 2021/22 Sweetener Market Data (SMD). Because September production in Louisiana is a product of the 2022/23 sugarcane harvest, Louisiana production in 2022/23 is adjusted downward by the September 2022 amount but partially offset by an increase in projected production in September 2023. More significantly, Louisiana production is increased due to the January NASS forecast of sugarcane for sugar production increasing by 5.1 percent over last month to 15,818,000 tons. Sucrose recovery is unchanged at 13.48 percent. Production for the fiscal 2022/23 year is now 2,112,885 STRV, up 88,216 over last month.

NASS projects 2022/23 sugarbeet production at 32,574,000, a 2.65 percent reduction, based on lower area harvested and yield. Lower sugarbeet production is more than offset by an increase in sucrose recovery. Based on sugar production data for August through November in the SMD, USDA projects sucrose recovery at 15.000 percent. This is up from last month's 14.626 percent that was based on historical trend. The combined effect on 2022/23 beet sugar production is an increase of 120,819 STRV to 5,048,318.

Sugar imports for 2022/23 are decreased by 35,480 STRV. Sugar under the 2021/22 TRQ permitted to enter by the extension of the quota year to the end of December was 164,225 STRV and below that estimated last month by 85,943. An offset comes from an increase in high-tier tariff imports by 50,000 STRV to 125,000 due to an expected increase in the pace of high-tier tariff refined sugar imports for the rest of the year and an increase in raw sugar high-tier imports recorded by Customs in December. Entries under the FTA TRQ are slightly increased as well. With no change in use, the change in ending stocks is equal to the supply

increase and the resulting ending stocks-to-use ratio is increased to 14.9 percent from 13.5 percent last month.

There are only small adjustments for 2022/23 Mexico supply and use. Exports are increased by a slight 759 metric ton (MT) total of exports to destinations other than those to the United States under license. With no change to ending stocks, deliveries to IMMEX are adjusted down by 759 MT. USDA projects Mexico sugar production for 2022/23 the same as last month at 5.900 million MT. USDA estimates that the sugar production campaign through the end of December is at least 15 percent behind the pace established over the preceding 9 years. Although there is some confidence that the pace will be accelerated, the evidence to date is lacking. The pace of the campaign will continue to be closely monitored.

LIVESTOCK, POULTRY, AND DAIRY: Red meat and poultry production for 2022 is lowered from last month as higher broiler and turkey production in the fourth quarter is more than offset by lower beef and pork. Changes reflect November production data and preliminary estimates of slaughter numbers and weights for December. Egg production is lowered slightly based on production and flock data.

For 2023, the beef forecast is raised with higher expected slaughter of steers and heifers, as well as cows and bulls. This increase is slightly offset by lower carcass weights. USDA's *Cattle* report, which will be released January 31, will provide an indication of the number of cattle available for placement during 2023 as well as producer intentions for retaining heifers for addition to the breeding herd. Pork production is raised reflecting pig crop data for the second half of 2022 and producer intentions for sow farrowing in the first half of 2023. Broiler production is reduced for the first quarter based on recent hatchery data. Turkey production is raised for the first quarter based on hatchery data. Egg production is reduced on a slower expected pace of recovery.

Beef export estimates for 2022 are lowered and imports are unchanged on recent trade data. For 2023, beef imports are raised, largely on higher expected imports from Brazil, but the export forecast is unchanged. Pork imports for 2022 are lowered, but exports are unchanged. For 2023, pork imports are lowered, but exports are raised. Broiler exports in 2022 are raised on recent trade data, while 2023 exports are lowered. Turkey exports are lowered for both 2022 and 2023.

Price estimates for 2022 are adjusted to reflect December data. For 2023, cattle prices are raised on expected strength in demand for fed cattle. Hog prices are raised in the middle quarters of 2023 reflecting demand strength. Broiler prices are projected lower as weaker prices in late 2022 are expected to carry over into 2023. Turkey and egg prices for 2023 are raised on recent prices and expectations of continued firm demand and tight supplies.

Milk production for 2022 is lowered from last month with lower expected milk per cow. The 2023 production forecast is lowered with a smaller expected average cow inventory for the year; output per cow is unchanged from last month. USDA's *Cattle* report, which will be released January 31, will provide an indication of producer intentions for retaining dairy heifers for addition to the breeding herd.

Driven by recent trade data, fat basis imports for 2022 are unchanged with offsetting changes for a number of products, but skim-solids basis imports are raised on expected

demand for milk proteins. Strength in milk protein demand is expected to carry into 2023 and the forecast for skim-solids imports is also raised. Fat basis imports for 2023 are unchanged. Exports on a fat basis for 2022 are raised, largely on butter and cheese with stronger expected butter exports supporting an increased forecast for 2023. Exports on a skim-solids basis are raised in 2022 on stronger cheese and lactose shipments. The 2023 forecast is raised on stronger skim milk powder exports.

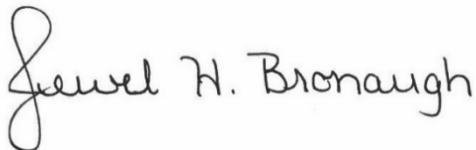

For 2022, product and Class price estimates are adjusted to reflect reported prices. For 2023, the price forecasts for all components are lower with expectations of weak domestic demand and price pressure in international markets. Forecasts for Class III and Class IV prices are lowered. The 2022 all milk price forecast is lowered to \$25.55 per cwt and the 2023 all milk price is lowered to \$21.60 per cwt.

COTTON: This month's U.S. 2022/23 cotton forecasts include higher production and ending stocks, no change in U.S. mill use, and lower exports. Production is 438,000 bales higher, at 14.7 million, with yield at a record 947 pounds per acre, up 9 percent from the December estimate. Exports are forecast 250,000 bales lower, at 12.0 million, with both projected world trade and the U.S. share slightly lower this month. Ending stocks are up 700,000 bales to 4.2 million, equal to 30 percent of projected use. The upland season-average price received by U.S. farmers is projected 2 cents lower this month at 83 cents per pound.

World 2022/23 ending stocks are forecast 370,000 bales higher this month as lower production is more than offset by a reduction in consumption. World production is forecast 330,000 bales lower than it was in December as lower production in India more than offsets gains in the United States and Brazil. Projected world consumption is 850,000 bales lower this month, at 110.9 million bales, a 5.7-percent decline from the previous year. Compared with the December outlook, India's 2022/23 consumption is forecast 500,000 bales lower, with smaller declines for Indonesia and Vietnam. Projected world trade is down 600,000 bales, to 41.7 million, as projected exports from the United States, India, and Argentina decline. Imports by China, Indonesia, and Vietnam are also projected lower.

Approved by the Secretary of Agriculture and by the Chairman of the World Agricultural Outlook Board, Mark Jekanowski, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

Other States 1/	13.00	13.90	17.40	17.60

Note: Totals may not add due to rounding. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of ending stocks by type (in mil. cwt): 2017/18-1.4; 2018/19-2.1; 2019/20-1.0. 3/ Residual includes unreported use, processing losses, and estimating errors. Use by type may not add to total rice use because of the difference in breakens between beginning and ending stocks. 4/ Includes rough rice and milled rice exports. Milled rice exports are converted to an equivalent rough basis. 5/ Expressed as a percent, i.e., the total quantity of whole kernel and broken rice produced divided by the quantity of rough rice milled. 6/ Marketing-year weighted average price received by farmers. 7/ Includes imports. 8/ Exports by type of rice are estimated. 9/ The California medium/short-grain season-average- farm price (SAFP) largely reflects rice that is marketed through price pools in California. The pool price is not final until all the rice in the pool is marketed for the crop year. Therefore, SAFP forecasts based on the average of NASS monthly prices and the final price may differ. 10/ Marketing year beginning October 1.

1/ Fiscal years beginning Oct 1. Data and projections correspond to category components from "Sweetener Market Data" (SMD). 2/ Production projections for 2021/22 and 2022/23 are based on Crop Production and/or processor projections/industry data and/or sugar ICEC analysis where appropriate. 3/ For 2021/22, WTO raw sugar TRQ shortfall (163) and for 2022/23 (255). 4/ Composed of sugar under the re-export and polyhydric alcohol programs. 5/ Transfers accompanying deliveries for sugar-containing products to be exported (SCP) and polyhydric alcohol manufacture (POLY), and deliveries for livestock feed and ethanol. Total refiner license transfers for SCP and POLY inclusive of WASDE-reported deliveries: 2020/21 -- 298; estimated 2021/22 -- 314; projected 2022/23 -- 315

U.S. Dairy Prices

	2020	2021	2022 Proj. Dec	2022 Est. Jan	2023 Proj. Dec	2023 Proj. Jan
Product Prices 1/						
Cheese	1.9236	1.6755	2.110	2.1122	1.995	1.930
Butter	1.5808	1.7325	2.875	2.8665	2.465	2.330
Nonfat Dry Milk	1.0417	1.2693	1.680	1.6851	1.375	1.340
Dry Whey	0.3621	0.5744	0.605	0.6035	0.465	0.415
<i>Dollars Per Pound</i>						
Milk Prices 2/						
Class III	18.16	17.08	21.95	21.94	19.80	18.85
Class IV	13.49	16.09	24.50	24.47	20.10	19.25
All Milk 3/	18.13	18.53	25.65	25.55	22.70	21.60
<i>Dollars Per Cwt</i>						

All prices are January-December averages. 1/ Simple average of monthly prices calculated by AMS from weekly average dairy product prices for class price computations. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

Reliability of January Projections 1/

Note: Tables on pages 35-37 present a record of the January projection and the final Estimate. Using world wheat production as an example, the "root mean square error" means that chances are 2 out of 3 that the current forecast will not be above or below the final estimate by more than 0.7 percent. Chances are 9 out of 10 (90% confidence level) that the difference will not exceed 1.1 percent. The average difference between the January projection and the final estimate is 3 million tons, ranging from 0 million to 8.3 million tons. The January projection has been below the estimate 31 times and above 9 times.

1/ Marketing years 1981/82 through 2021/22 for grains, soybeans (U.S. only), and cotton. There was no WASDE published in January 2019, due to a partial government shutdown, no 2018/19 forecasts were published for that month. Final for grains, soybeans, and cotton is defined as the first November estimate following the marketing year for 1981/82 through 2020/21, and for 2021/22 the last month's estimate. 2/ Includes corn, sorghum, barley, oats, rye, millet, and mixed grain.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. Marketing years 1981/82 through 2021/22 for grains, soybeans, and cotton. Final for grains, soybeans, and cotton is defined as the first November estimate following the marketing year for 1981/82 through 2021/22. Calendar years 1982 through 2021 for meats, eggs, and milk. Final for animal products is defined as the latest annual production estimate published by NASS for 1982-2021. There was no WASDE published in January 2019, due to a partial government shutdown, so no 2018/19 forecasts were published in that month for grains, soybeans, and cotton, and no 2018 forecasts were published in that month for animal products.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <https://apps.fas.usda.gov/psdonline/app/index.html>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the International Production Assessment Division (IPAD) of the Foreign Agricultural Service. IPAD is located at <https://ipad.fas.usda.gov/>.

U.S. DEPARTMENT OF AGRICULTURE

Hybrid
Event

USDA's 99th Annual Agricultural Outlook Forum

U.S. Agriculture: Seeds of Growth Through Innovation

February 23-24, 2023

You're invited to USDA's largest annual gathering and the agricultural sector's premier event—the 2023 Agricultural Outlook Forum. The Forum will be held in person on February 23-24, 2023, at the Crystal City Gateway Marriott, Arlington, VA and all sessions will be livestreamed.

The program will feature an exceptional lineup of topics and speakers!

- Join Chief Economist Seth Meyer as he unveils USDA's initial forecast for the agricultural economy, commodity markets, and trade in 2023 and discuss U.S. farm income situation.
- Learn from more than 100 subject matter experts, executives and academics as they discuss some of the most pressing issues impacting agriculture and potential solutions.
- Get the latest on supply chain challenges and solutions, climate-smart agriculture and more!

Participants can attend the Agricultural Outlook Forum in person or virtually. Registration is required for both virtual and in-person attendance. There is no cost to attending the Forum virtually.

For more information, see the Forum's [Program at a Glance](#)

Don't miss your chance to hear the latest updates from industry leaders.

World Agricultural Supply and Demand Estimates

WASDE-632 – January 12, 2023

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
